Feet "socks" are optional and usually skipped in art (his feet are the same color as front of legs / belly). They're more important for eg. fursuit

📖 ABOUT CHARACTER

Kromek [*kɾɔmɛk*] or “Kro” for short is a brown domestic kitty who also happens to have a knack for being a fluffy internet personality. He *may* be very shy in person and tend to avoid social interactions, but online, he feels he can truly be himself.

His *almost* cartoonish presence greatly complements his cartoonish personality.

Kromek’s extra fluffy brown fur is loved by many of his furry friends. Due to him being rather short compared to them, he’s an ideal companion for long cuddling sessions. He’s a very needy for attention kitten, especially when it comes to belly rubs, head pats, and huggies ;3

On the internet, people tend to hate on or even bully him for *being different*.

Kromek though won’t let mean people get him down. He strives to share not only his extensive knowledge about Minecraft but also his deep bond with the furry and LGBT communities, encouraging others that being *different and* expressing your true self is not a bad thing!

✓ DO'S

- Representing in **all forms and all body types** (anthro, feral, taur, merfur etc.)
- Adding **clothes or accessories** (hoodies, sports outfits, wristbands, etc.), including those **traditionally associated with the opposite gender** (e.g. thigh-high socks, skirts, sleeves, etc.)
- Depicting in **battles**, wielding **traditional weapons** (swords, axes, bows), with **minor wounds or bruises**, or in a **defeated fantasy pose** (no blood or deep wounds, something along the lines of video game death is ok)
- Showing in **friendly** or **romantic** interactions with other characters
- You **CAN** depict him in a tactical outfit and holding / posing with a firearm but he **CAN'T** use it. Basically, **he can pose** in a military vest with a rifle in his paws, but **dont draw him** shooting someone in the head ykwim

Acceptable "quirks" include:

- transformation or so-called "transfur"
- shapeshifting, either by himself or others
- macro / hyper / muscle growth
- conjoinment / merging / fusion / multi
- gender swap / gender bend
- paws / beans / maws

? ASK FIRST

*Generally I'm ok with things on this list, but bear in mind that my audience consist of teens under 18. If you draw something not suitable for everyone with my OC, please **don't post it on places, that are meant for everyone or will let underage access them easily**. Post them on places dedicated for mature content, like FurAffinity or e621. If you're posting it on Twitter – mark media as sensitive!*

- Wearing **suggestive clothing**, portraying in erotic / sexual situations
- Portraying his **private areas** in detail
- Showing with **cigarettes, drugs, alcohol, 420** etc.
- **Portraying in fights** that are **not obsessively gorey** or otherwise inappropriate (eg. him being a soldier of Russia or Israel)
- Depicting in **depressive or maniacal humor**

Questionable "quirks" include:

- vore of any kind
- pregnancy

✗ ABSOLUTELY DO NOT'S!!

*These themes I am NOT okay with under ANY circumstances. There aren't many of these, but they're self explanatory. I will **NEVER** ask you to portrait Kromek in these **situations** and I will be asking you to **remove ANY post on ANY platform that you made on these**. These will also get you banned from my spaces, so it's a one way ticket freaks ;3*

- **Extreme gore** like decapitation, mangled body, suicide, selfharm
- **Rape and sex exploitation**
- **Bestiality** – by that term I understand every art piece that depicts a feral animal engaging in sex activity, even with another feral

Also, these non art-specific behaviours **will** result in me **restricting your access to my content and spaces**:

- Repetively creating artwork after I specifically told you not to (either bc ur a piece of sh*t or you violated any of less severe rules)
- Violating my copyright / copying my OC and claiming it as your own
- Harassing me with stuff you make with my OCs
- **Using AI to make art of my OC. I prohibit using my designs in AI training.**
